

**New Task Training Form Report**  
**30 CFR Part 46**

**Task: The Operation of a MTL-20 Mustang**  
Equipment # : BC-22, & BC-24

Objectives: Employee will demonstrate safe operating procedures for operating a MTL-20 Mustang as well as to correctly understand the safety signs that are posted on the equipment.

Training Material: Copy of the Owner's Instruction Manual  
Company Designated Training Person

**A.) Training Methods:** Review the following sections of the owner's instruction manual and discuss with the designated training person.

(Owner's Instruction Manual)

(Designated Training Person)

**Safety Section:**

\*Safety Messages pg. 116 - 118

Explain to the trainee what the signs around the equipment mean.

\*Crushing & Cutting Prevention pg.10 - 12

Show the crush points & possible pinch points on the piece of equipment

\*Before Starting Engine: Trainer Explanation

Show & Explain how to do a full pre-shift inspection

\*Use steps & hand holds: Trainer

Demonstrate proper mounting and dismounting, and how to position the machine to do this safely

\*Parking: Trainer

Demonstrate proper parking procedures

\*Hydraulic Power Lose (Trainer)

Explain what to do if there is a lose of hydraulic power

\*Guards pgs: 12 - 14

Show the trainee the R.O.P. system and how to use the specially designed hammer to fracture the window.

\* Working Ranges pg. 118 - 132

Explain the load capacity of different buckets, and how each attachment is hooked & un-hooked

\*Visibility Information (Trainer)

Explain the limits of visibility of the piece of equipment during the operation, show how objects can have a restricted view from the blind spots

\*Slope Operation: Trainer Explanation

Operation of the equipment on a slope will decrease the stability of the machine and needs to have an experienced operator doing such an operation

**B.) Discuss / Demonstrate:** Discuss / demonstrate the following job responsibilities and the hazards associated with operation.

1.) Pre-Operational Checks

- Back-Up Alarm - Test
- Cooling System Coolant Level - Check
- Indicators & Gauges - Test
- Lift Arms - Inspect
- Track Pads - Check
- Bucket - Inspect

- Breaking System - Test
- Engine Oil Level - Check
- Seat Belt - Inspect
- Transmission & Hydraulic system oil level - Check
- Windows (If they are present) - Clean

2.) Proper starting and operational techniques

- Before starting; make sure to know how to make adjustments to the seat & seat belt
- Know how to work the work lights
- Positioning of the machine to dig
- Windshield Cleaning Techniques
- Joystick Control
- Windshield wipers
- Seat Stabilizer Mode
- Precaution of under-mining of the machine
- Load capacity of the bucket

3.) Operation of the machine

- The designated company trainer will observe the trainee as he/she moves loads from a location to another location.

- If the trainee fails to show proper operating procedures, the trainer will go back over the information for the failed procedure. Once covered material is covered the trainer will re-observe the trainee perform the task again until the trainer is satisfied that the trainee has the proper skills to perform tasks with this piece of equipment.

C.) The remainder of the task training will be accomplished through the employee (trainee) practicing the operational steps while being closely observed by a competent trainer while performing the task. When the competent person states that the newly-assigned employee has demonstrated proficiency in performing the task safely, the task training will be considered completed. Once completed; the signatures of both employees is required below.

**Completed** \_\_\_\_\_ (Print Name)  
**Date:** \_\_\_\_\_ **Trainee:** \_\_\_\_\_
